## Canada North Environmental Services

**CANADA NORTH ENVIRONMENTAL SERVICES LIMITED PARTNERSHIP** is an aboriginal-owned, multi-disciplinary environmental consulting firm, providing innovative environmental services for the resource fields of mining, forestry, agriculture, and infrastructure development.

**CanNorth's Corporate Objectives** are to:

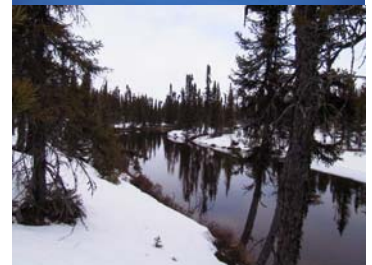

- provide high quality cost-effective environmental services to Canadian and international resource developers and government agencies;
- involve and train aboriginal people in environmental monitoring programs; and
- facilitate effective communication of environmental issues between government, industry, and aboriginal people.

### AQUATIC ENVIRONMENT

**CanNorth** has been involved in the design and implementation of environmental projects for numerous mining and natural resource management developments. For example, environmental impact assessments, environmental effects monitoring, watershed management, aquatic habitat assessments, and fish studies have been successfully completed, meeting or exceeding regulatory standards, for many mining and other natural resource development projects.

### TERRESTRIAL ENVIRONMENT

**CanNorth** has conducted numerous wildlife population and habitat investigations which allows us to perform impact assessments and develop effective habitat management plans. Botanical inventories and rare plant surveys are conducted to assist with project planning as well as the design and implementation of reclamation and revegetation programs.

# CanNorth's Services

## Socio-Economic Training

Training of Aboriginal Peoples in Environmental Monitoring Programs  
Facilitation of Communication of Environmental Issues between Government, Industry, and Aboriginal People

## Environmental / Scientific

Environmental Impact Assessments  
Risk Management Solutions
